Dear Colleagues,

We have been made aware that a number of our divisions have been merged and as a result this has combined the draws on our website. Everything on the back end of the system has not been affected and the fixtures are showing correctly however we have discovered a slight glitch in the system which may be currently showing teams that are not in your division.

We are in communication with Sports TG who is currently working on fixing this error that has occurred. We apologise for any confusion or inconvenience this may have caused. We do appreciate your patience and understanding regarding this. We are looking to have this rectified as soon as possible.
